
Problem with the language / resource files

Posted by dolesoft - 2007/08/09 05:48

There's a known bug with 'labels and button texts not being displayed in the right language'. E.g. the text in the messageboxes is Dutch but the text on the button is in English?

We are aware of this problem, there's something wrong with the resource files and we are trying to find out what we can do about it..
