

I want to buy the DigiWaiter!

Please test the programs of the DigiWaiter suite thoroughly before you decide to buy licenses.

Since development of the Suite is a continuous proces and we are aware there are still quite some bugs in the software we want you to be sure what you get is what you buy in other words the shareware principle of the DigiWaiter should give you all the info you need if it's to your liking or not.

We will be there to try and answer your questions within 12 - 24 hours or faster.

What you see is what you get, make sure you like what you see before you get it!
