

An easy way to enter the license code on your PDA client

We created an option in the last DigiWaiter PDA client update to 'paste' the code in the 'key field'.

Copy and paste the key you receive in a text file.

Put the file with activesync on your pda, open it and with your stylus choose copy.

After that startup the DigiWaiter (can't copy paste if the DigiWaiter's already running). go to the registration screen and choose paste, et voila!
