

## Can't connect PDA by hostname

Sometimes people have problems connecting to the server (pc where the Digiwaiter server runs) by hostname.

You could try one of these articles:

[http://www.pocketpcmag.com/forum/post.asp?method=Reply&TOPIC\\_ID=24918&FORUM\\_ID=14](http://www.pocketpcmag.com/forum/post.asp?method=Reply&TOPIC_ID=24918&FORUM_ID=14)

<http://www.tutorials-se.com/wireless/iPaq-problem/>

We are currently trying to create an options which makes it possible to enter the IP address of the server as well as the hostname, the PDA client should try both.
